Address: 132-nd street, 18, 1172, Sofia, Bulgaria (Home)

About me:
I recently completed my education path in Software University and I'm highly motivated to learn more in a real work environment. The language I use is C# and I am currently working on improving my skills by developing my personal project through out my internship. Right now, I'm most excited about building web applications and working in back-end development , but I'm open to expanding my knowledge in various positions. I'm well-organized, communicative, team-player and eager to learn.

WORK EXPERIENCE

1 MAR 2023 – CURRENT Sofia, Bulgaria
JUNIOR SOFTWARE DEVELOPER AMDARIS

After successfully completing the internship of Amdaris I got the opportunity as a Junior Software Developer, which entails the following responsibilities:

1. Daily scrum meetings for reviewing the tasks and the related impediments
2. Implementing the given tasks, working on the frond-end of the application with React and Type Script
3. Participating in code refinement sessions

1 NOV 2022 – CURRENT Sofia, Bulgaria
SOFTWARE DEVELOPMENT INTERN AMDARIS

During my training at the academy, I got an internship opportunity at a very well-developed outsourcing company. In this internship, I worked on building the back-end and front-end of a project with an idea of my own. I was given the opportunity to gain knowledge with the **React** library and also **C#/JS/HTML/CSS**.

15 MAY 2019 – 21 OCT 2022 Varna, Sofia, Bulgaria
DELIVERY DRIVER MAESTRO TRADE, SPEEDY, UPS

Before moving to Sofia I lived in Varna and worked in company that delivered goods to supermarkets called Maestro Trade. Than I moved to Sofia after applying for Software University and started working as a courier. All three positions require communication with customers, finding solutions for different kinds of problems between the customers and the company, as well as organizational skills.

EDUCATION AND TRAINING

11 FEB 2021 – 18 DEC 2022 Sofia, Bulgaria
SOFTWARE DEVELOPER Software University

In the path of this academy we started with the basics of the C# language and continued with the fundamentals. After completing both modules we started to dive deep in the sphere.

 3-Th module:

- C# Object Orientated Programming and SOLID principles
- C# Advanced programming techniques

4-Th module:

- JS Advanced, HTML/CSS

5-Th module:

- Working with MS SQL and Entity Framework Core

The last module focused on the ASP.NET Core web framework. Starting with the basics of the framework and the HTTP protocol. Moving on with the second part of the module, learn the details of the ASP.NET Core world, developing an ASP.NET MVC project.
